

Certified Logistics Technician

Training & Certification

CERTIFIED LOGISTICS TECHNICIAN

CLT is a nationally portable, industry-led program that prepares individuals for front-line material handling and supply chain logistics jobs in fulfillment centers, warehouses, distribution centers, and factories. This training program includes a stackable certification for employees with the 21st Century, in-demand skills needed for long-term career paths in over 5.8 million supply chain logistics jobs.

Columbus Tech is an MSSC authorized training and testing center. Our instructors are easily accessible and certification exams are conveniently offered on campus or virtually.

Why Select the CLT Program?

- Nationally accredited
- Improves employee performance and retention
- Reduces recruitment and training cost
- Customized by Columbus Tech and delivered by our CLT certified instructors
- Improves marketability when seeking employment

Program Certifications

CLA is the foundational-level logistics certification and is required before continuing to the CLT mid-level program. Course content includes:

- Operation and use of equipment
- Safety principles
- Quality control principles
- Work communication practices
- Computer systems and applications
- Receiving and processing products
- Shipping processes
- Inventory control
- Safe handling of hazardous materials
- Transportation modes
- U.S. measurements and metric system conversions
