PROGRAM OVERVIEW

Cybercrime is a very serious threat to today's world. The cybersecurity program prepares students in real-world skills to troubleshoot and assess the security needs of computers and network systems. They will learn how to recommend, install, and maintain safeguard solutions, as well as manage the implementation and maintenance of security devices, systems, and procedures. Students may earn a two-year associate degree, diploma, or certificate of credit specializing in cybersecurity.

Program length varies.

The Computer Forensics and Investigation TCC program includes academic and professional training for students in detecting and investigating computer related criminal activity and/or unauthorized use. The curriculum is designed to develop knowledge and skills in technical evidence identification, investigative computer systems, information security, search and seizure, and the administration of criminal sanctions.

Program length is twenty-six (26) credit hours.

Columbus Technical College is accredited by the Southern Association of Colleges and Schools Commission on Colleges.

JOB PROSPECTS
